

## ROSTER ANALYSER

### Description

Opturion's Roster Analyser is a powerful tool that analyses roster for fatigue risk. It is the first technology that employs multiple fatigue models together with additional best practice rules. The analyser can be fully customised with your fatigue risk requirements. It provides instant feedback on roster compliance with those requirements.

### Features

- Simple RESTful web API.
- Accepts roster to analyse in either JSON or Microsoft Excel format.
- Generates analysis results in either JSON or Microsoft Excel format.
- Stateless: no client roster data is retained by the service after analysis is complete.
- Available as software as a service (SaaS) offering.
- SaaS offering hosted by AWS in the Sydney region.
- All communication is encrypted and uses HTTP over SSL/TLS (HTTPS).
- Also available as on-premises offering.
